U.S. Patent and Trademark Office PTOL-326 (Rev. 08-06) Application/Control Number: 10/520,724

Art Unit: 3767

#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schock et al (US 5,254,097)

Schock teaches a device for injection, comprising a body (10) provided with a first channel (14) for conveyance of a first medical substance and a first connecting component (30) having a first port (32a) for introduction of a first medical substance into said first channel, and a second channel (42) for conveyance of a second medical substance and a second connecting component (36) having a second port (46) said second port (46) has a first flexible membrane (45) which can be opened by means of an injection component for injecting a second medical substance into said second channel, and provided with a third connecting component (12) being common to the first and the second channels and having at least one third port (39) for conveying medical substances out from said first and second channels, characterized in that connecting components and the body are designed as an integrated unit (Fig 2), and said third connecting component is a first luer fitting component provided with a thread (28) for releasable connection with a second luer fitting component having a corresponding thread, for creating a luer fitting coupling.

Application/Control Number: 10/520,724 Page 3

Art Unit: 3767

As to claim 2, Fig 2; claim 3, said third connecting component (distal portion of the body) has a fourth port (46), wherein said third port (at 41) constitutes an outlet for the first channel and said fourth port constitutes an outlet for the second channel; as to claim 4, second flexible membrane arranged in an injection component (34) which is connectable to said second connecting component (Fig 2); as to claim 5, the device has a means (36) for holding said second flexible membrane with a pressure against said first membrane; as to claims 6-10, Fig 2,6 and 8.

Schock does not teach that the first channel extends in a generally straight line through the body of the device. Instead, the second channel extends in a generally straight line through the device (Fig 2). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the first channel generally straight as one of ordinary skill in the art would have expected the device to function equally well with either channel being straight.

## Response to Arguments

3. Applicant's arguments with respect to claims 1-11 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 10/520,724

Art Unit: 3767

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
